Interactive Infographics to Combat Bullying in School

Welcome to Sticks and Stones Project!

Project's presentation

Welcome to Sticks and Stones project newsletter, here you will find information about the project's state, what are partners working on and what our next steps will be.

As you may know, with this project we aim at increasing the capacity and raising awareness in combating bullying among primary school communities, by providing them with multi-functional and multi-dimensional tools and practices based on a whole school approach.

Not only you can follow the project on the newsletters you receive but also by following partners' Facebook pages where we release some updates of the project and on the project's website: <https://sticksnstones.eu/en/>

Project's results

The Sticks'n'Stones project consortium adopts a whole school approach that builds a whole school programme that engages primary school leaders and teachers, pupils and parents in detecting and combating bullying of various forms, through targeted educational materials.

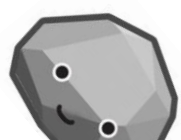

IO1 – Toolkit of Interactive Infographic Resources to Combat Bullying: these resources are developed so that teachers and school leaders can display the infographics around their school so that pupils who are victims of, or witnesses to, bullying can follow the QR code to find self-help resources, supports and advice.

IO2 – Continuing Professional Development (CPD) Training Programme for Primary Teachers: this programme comprises 50 hours of Continuing Professionals Development training and resources for primary teachers so that they can learn more about what they can do to tackle instances of bullying in their schools. The programme enables teachers to develop their pedagogic and digital skills to create their own interactive infographic resources and challenge-based learning resources that can then be applied to a variety of curriculum areas and topics.

IO3 – Sticks'n'Stones Digital Resources for Parents: These resources comprise short instructional videos, tip-sheets and self-care exercises that parents can complete with their children at home. The aim of these resources is to make parents aware of the dangers and threats that their children face from cyberbullies online.

IO4 – Sticks'n'Stones MOOC: This resource provides access to the Toolkit of Interactive Infographic Resources to Combat Bullying, the CPD Training Programme for Primary Teachers and the Sticks'n'Stones Digital Resources for Parents, to support the 'whole-school approach' to combating bullying proposed in this application.

Partners first steps and meetings

Due to COVID-19 pandemic, the project suffered some delays, but the consortium met online in order to start working on the materials and ideas of the project.

After some online meetings, partners started working on the development of IO1 activities which are almost ready!

IO2 materials will be tested as well as IO1 in partners' local schools in September so we can improve them at the end of the project and have them ready for the schools to use all the materials during the next school year.

In spite all the difficulties we encountered to meet face to face, we managed to do it in the past months! We successfully organised two face to face bilateral meetings, one in Greece and one in Cyprus, and then one Transnational Partner Meeting with the representation of most partner-organisations face to face. This step was very significant for the consortium as we could clarify some important points of the project and keep going with our work. Along with that, seeing each other in person again was key to our collaboration!

Transnational project meeting in Cyprus (June, 2022)
